Hyflex Symposium
Admission Free · Registration Required

**Gender Mainstreaming
to Transform the Future of Humanity:
The Call for New Leadership**

Through the lens of the "Toyooka Method"—a framework proposed by Asako Osaki and implemented in Toyooka City—this session explores the relationship between gender equality and regional revitalization. By integrating the perspectives of UN Women, the UN NGO Committee, and the Japanese government, we will redefine Japan's unique regional challenges within an international context. Based on Sophia University's philosophy of "For Others, With Others," we will propose a vision for a truly equitable society led by the next generation.
